THE NEW YORK COLISEUM, WHICH WILL PRESENT THE FIRST INTERNATIONAL COMMUNICATIONS FAIR, NOVEMBER 28TH THROUGH DECEMBER 2ND. SEE STORY ON PAGE 5.

new! Hammarlund CB-23

$229.50
complete

REVOLUTIONIZES CITIZEN BAND CONCEPTS!

- Crystal-Controlled 23 channel RECEIVE
- Crystal-Controlled 23 channel TRANSMIT
- NO EXTRAS—Every crystal, push-to-talk microphone, cables and mobile mounting bracket included in **ONE LOW PRICE**
- ±3 KC Receiver Vernier Tuning Control (No effect on transmitted frequencies)
- Dual Power Supply—Mobile or Base Station—12V DC—117V AC

Hammarlund's CB-23 really goes all the way. It provides you with crystal controlled stability on 23 channels—receive or transmit—with the added facility offered by the ±3KC Receiver Vernier Tuning Control. This amazing transceiver has every feature you have ever wanted in a citizen band unit. Peak "Talk-Power," dual conversion super-heterodyne receiver, noise limiter, adjustable squelch, and built-in S-meter to indicate relative rf transmitter output plus strength of the received signal—built-in . . . at no extra cost.

The CB-23 is ready to go—Just add an Antenna and you're "On the Air"

Best of all—it's a Hammarlund designed and manufactured unit—you KNOW—you take no chance on quality.

Get the complete story now! Mail in the attached coupon and we will rush CB-23 literature out to you by return mail.

THANK YOU, BILL!

Dear Ray and Warren:

About a year ago, when I talked to one of you, you said you would send me one of your papers. At that time, I did not know what it was. I will tell you right now, it is the best book on C/B; I have seen yet. I subscribed for 3 other books on C/B, but none of them had the coverage of activities and seriousness on C/B that your book does. If C/B NEWS folds up, here is one guy who is going to miss it, for I look forward to receiving it every month. Here's our donation. I hope everyone else sees as I do and kicks in.

A fellow C/B'er,
Bill and Jean McDevitt, Jr., 2Q3531 and KIC1800, Oil City, Pennsylvania

STATIC PUSHERS
Rockford, Illinois

On September 23, 1961, a new C. B. Club in the Northern Illinois area was formed at the home of Mr. Tony-Noto, 18Q2609. The first few meetings were quite informal. Later a club name was drafted, along with a constitution and election of officers. The club was named "The Static Pushers Citizens Band Radio Club".

The officers of this new club are:

Chairman	Mr. Raleigh Ingram 18Q6890
Vice Chairman	Mrs. Marty Hendel 18Q0299
Secretary	Mrs. Shirley Kaszuba KHA3784
Treasurer	Mr. Dick Burman 18Q7591

The main purpose of the club is;

To promote fellowship and good will between users of citizens band radio.
To provide a place for the free interchange of information pertaining to citizen band radio; specifically technical information; information concerning equipment; information concerning the rules and regulations of the band; and, information pertaining to the uses of citizens band radio.
To adopt and promote standards to make the band more usuful and orderly.
To offer voluntary communications service to the general public and other organizations.

We hold our meetings every other Saturday evening at various places; until we can find a permanent base. No one yet seems to mind moving around!

In the past year we have kept busy with transmitter hunts; picnics and tours; and attending various jamborees.

Our most important project now is assembling our monitor base station. We have found a young man, Mr. John Schleicher, Rockford, Illinois, who is a paraplegic and quite interested in radio communications. John will monitor channel 9 in the Rockford area. He will relay messages and give assistance over the air to CBer's traveling through the area. The base antenna has been installed and awaiting the CB transceiver, which is all being furnished by the club.

Another project we are working on is to place posters at the different entrances to the City, informing travelling CB'ers that we monitor channels 9 and 11.

Our club now has a newspaper being published every month called "The Static Pusher". The paper is still very young, but it is growing with every issue, with news about fellow members, other CBer's in the area and interesting CB radio topics.

If you are ever in the Rockford area, give us a call on channel 9 and we will organize a "coffee call" so that you may meet a few of the Static Pushers or other CBer's in and around Rockford, Illinois.

Thank you!
10-10 and 73's
Jack Waterson - 18B1902

C/B'ERS
Dover, N.H.

I am writing in regards to C/B NEWS. I was asked by all of our club members to send you our names and addresses for your mailing list.

Here is a list of activities that are scheduled for the coming months. In November, we will have an auction of C/B equipment. December, we will make up baskets of groceries for the needy and turn them over to the Salvation Army, for distribution. January, the makers of TRAM C/B radios will visit us. February, De Mambro Electronics will show us the new HALLICRAFTERS C/B radio. We monitor channel 15.

Yours truly,
Norman L. Fallin, KBA 2351
Secretary C/B'ers.

UNION NEW JERSEY C/B

On October 14th, there was a seven town co-ordinated Civil Defense operation in which the C.B. operators of the Union New Jersey chapter were involved. Their duties were providing escort communications for convoys going through Union to the town of assembly; also setting up check points along the Ambulance route and at the hospital where base control was in operation.

We also provided communications at all points covered by the Auxiliary police of Kenilworth and Union.

The members who participated under the direction of Union Police officer Robert Foster were: Jack Rappaport, 2A4095; Dave Fertig, 2A3681; Morris Fertig, 2A3596; Win Winson, 2A3666; L. Randolph, 2Q1671; Cy O'Boyle, 2A4550; George and Jean Minnick, 2A5875; Dick Rosar, 2W4931; George Weber, 2Q6678; Bill Malbourn, 2Q2551; Bob & Lou Hoolko, 2Q3965; Ronald Gulis, KBG1663, Hy Rappaport, 2W5357. All the above mentioned stations are also members of the Union County Citizen's Radio Emergency Corp.

Base, mobile and walkie talkie units were employed throughout the drill.

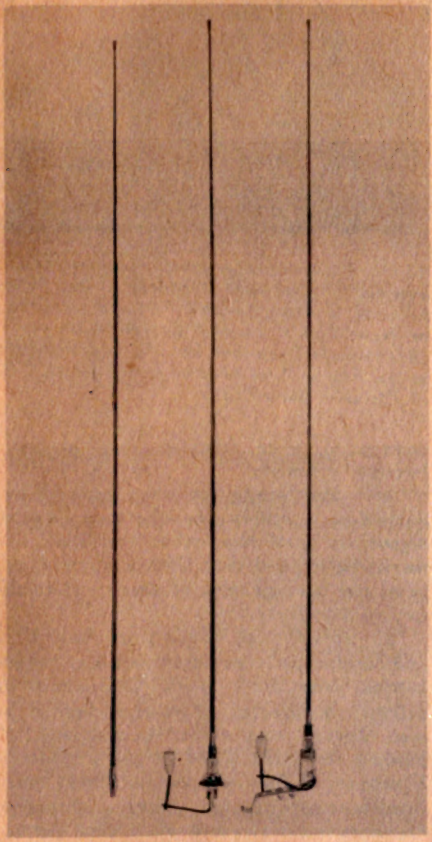
The Junior Police of Union also participated in this exercise. They utilized C.B. Type of communications and coordinated their duties with ours.

Jack Rappaport
UCCREC Director

NEW FROM A/S

New on the CB antenna market is the Black Beauty Fiberglas antennas manufactured by the Antenna Specialists Co., Cleveland, Ohio.

M. F. Friedberg, President, reported that in manufacturing the Black Beauty, the solid black, fiberglas sleeving is produced through a Thermofit PVC process which eliminates brittleness



and cracking. It also eliminates mottling and graying even after long service. Mr. Friedberg added that "the classic yet basic color of black is ideal for mounting on any mobile unit regardless of color of car."

The Black Beauty is center loaded and is only 48" high. It is available in cowl, deck or fender mount and trunk mount. Mounting is in contrasting chrome and black.

INTERNATIONAL COMMUNICATIONS FAIR, NOVEMBER 28-DECEMBER 2 AT NEW YORK'S COLISEUM TO PROVIDE HEALTHY KICK TO CITIZENS BAND GROWTH.

Citizens Band radio is, to those who know of it, one of the most exciting new developments in communications in decades, and one of almost limitless potential for business, government and the individual. But let's face it, there are still millions in this country who would avail themselves of its countless applications if only someone, somehow, would let them know about it.

The many Citizens Band groups now in existence are not much help in this direction since they tend to be insular in concept, providing information on Citizens Band only to those already immersed in the field. What has been needed is a large, well publicized Citizens Band display that would draw, not just those already interested in Citizens Band, but John Q. Public, who sufficiently stimulated and enlightened, could really put the capital "C" in Citizens Band.

That need is now rapidly drawing near to fulfillment, for November 28th through December 2nd, the First International Communications Fair will be open to the general public and representatives of industry at New York's famous Coliseum, "the" spot for trade shows in the greatest and most influential city in the world.

The First International Communications Fair, presented by Harold R. Meyer, the foremost expert in the field of expositions, will be an event geared to show every category of electronic communication equipment currently extant, but one of the planned highlights of the Fair will be the space devoted to Citizens Band. There will be live demonstrations of Citizens Band Equipment by manufacturers and Citizens Band Clubs, special Washington D.C. representatives to talk on Citizens Band subjects, and special booths set up to answer the public's questions on Citizens Band, as well as a huge array of Citizens Band Equipment set up by the various manufacturers, in booths manned by experts in the subject.

Mr. Meyer estimates that Citizens Band Radio, in the New York area alone, will be applicable to over 35,000 plants and factories in N.Y.'s five boroughs, 500 Motor Truck Companies, 1,545

Advertising Agencies, 9,742 Cleaning Shops and Cleaning & Dyeing Plants, 8,000 Laundries, 203 Photo Finishing Laboratories, 3,232 Auto Repair Shops (Radio, TV, Electrical, Refrigerator, etc.) 9,725 Drug Stores, 4,410 Amusement Recreation Services (Pools, Bowling Alleys, Commercial Sports, Golf Clubs, Skating Rinks), 1,630,000 Professional, Managerial, Technical people employed in New York Metropolitan Area, 1,810,000 Employes in Clerical and Sales, 2,190,000 employed as Craftsmen Foreman Operatives, 92 Airfields, 1,000 Marines, 3,300 Oil Delivery Companies, 25,000 Building Contractors, 1,500 Cab Companies, 50 Bus Companies, 400 Children's Camps, 49,000 Doctors, 57,000 Lawyers, 22,000 Dentists, 60,000 Hams, 30 Airlines Services N.Y. Metropolitan Area and 50,000 already firmly entrenched C/B'ers.

With a saturation campaign of advertising in newspapers, TV, radio, etc, and an equally thorough coverage by mailing campaign to all businesses, professions, and services who are potential customers for Citizens Band. The First International Communications Fair is a certain bet to put Citizens Band firmly on the public map, with plans already under way to stage the Fair in various other cities during 1963.

Despite its now mammoth proportions, The First International Communications Fair began with nothing more than a young man's idle dream.

Two years ago, Mike Aberman dropped into a neighborhood garage in Albany, New York, and became interested in an unusual radio unit that was attached to one of the establishment's trucks. Intrigued, he asked what it was, and was told "It's one of those new Citizens Band set ups."

It didn't take Mike long to become sold on the outfit's great potential uses, and by the next day he'd bought a set, applied for a license, and, finding his interest increasing rather than diminishing with each use of Citizens Band, became a member of the Albany Citizens Band Club, eventually attaining its presidency.

It was at this point that he got the idea of organizing a trade show that would expose the little-known field of citizens communications to the general public. It was just a dream at first, but the more he thought about it, the more convinced Mike became that it could become a reality.

Harold R. Meyer, Dynamic producer of the mammoth trade and consumer First International Communications Fair, to be staged at New York's famous Coliseum November 28th through December 2nd. A major highlight of the Fair will be devoted to the entire field of Citizens Band Radio.

At this stage of the game Steve Safranko, a buddy of Mike's, appeared. Agreeing with Mike that the idea had merit, he argued that such a show would need the management of an expert in the exposition field.

So Steve hied himself to New York and Manhattan's world-famous exposition center, the New York Coliseum. He talked to several promoters before he met Meyer, who came recommended to him as the Mike Todd of the exposition business. The dynamism and quick intelligence of Mr. Meyer impressed Steve immediately, and when Mike showed up, the three of them got down to brass tacks without further ado. Thus, although the original conception was broadened by Meyer to include every other field of communications, Citizens Band still remains the heart of The First International Communications Fair.

Among the manufacturers exhibiting at the Fair will be Utica Communications, ECI, Hammarlund, Rohn Towers, RCA, Polytronics, B & K Mfg., E-Z Way Towers, Hallicrafters, Lafayette Radio, Electra

new and *available now!*

"MESSENGER TWO" CB TRANSCEIVER

"TONE ALERT" SELECTIVE CALLING SYSTEM

- **10 channels at flip of a switch — illuminated indicator!**
- **Increased sensitivity, high adjacent channel rejection!**
- **New . . . high efficiency noise limiter circuit!**
- **Provision for plug-in selective calling system!**

Here's the new "Messenger Two" — with everything you've ever wanted in CB transceiver! Basic circuitry is patterned after the popular "Messenger". Highly efficient circuit design makes full use of maximum legal power . . . delivers a penetrating signal that "outperforms 'em all!" Looking for maximum receiver sensitivity? This unit is hot — pulls in signals you wouldn't know were around with less sensitive equipment . . . and adjacent channel rejection is tops! Tired of noisy receiver? New, noise limiter circuit in the "Messenger Two" lets you know what QUIET really means in a CB rig! Positive acting "squelch" and automatic volume control circuits — 10 channel coverage — push-to-talk microphone. Only 5⅝" x 7" x 11⅜", easy to install anywhere.

Cat. No. 242-162 115 VAC and 6 VDC **$169.95**
Cat. No. 242-163 115 VAC and 12 VDC . . . . . **NET**

5 CHANNEL "MESSENGER" TRANSCEIVER . . . Now at a new lower price, the big seller in the CB field! Excellent sensitivity and selectivity — punches out a power-packed signal! "Squelch" circuitry. . . . . .
Priced from **$129.95 NET**

1 WATT AND 100 MILLIWATT "PERSONAL MESSENGERS"—Compact, 11 transistors and 4 diodes. Superhet receiver with exclusive tuned RF amplifier gives twice the sensitivity and 40% more range than similar units with conventional circuitry—more output than similar units with same rated inputs! Priced from **$109.50 NET**

SEE YOUR DEALER-DISTRIBUTOR AND ASK FOR A DEMONSTRATION

BRAND NEW! A complete selective calling system with 37 different available tones!

The ultimate for any CB installation — designed for serious industrial, police and emergency use. Mutes speakers on your units until one calls another — then automatically your stations receive audio note and indicator light flashes "on", remaining lighted until call is answered. Eliminates annoyance of hearing "skip", electrical noise, or transmissions not meant for you!

- Not a kit, ready to go! Plugs into "Messenger Two", fast hook-up to your existing equipment!
- Sharp selectivity guards against random triggering which broad response units can't prevent!
- Wide range of tones permits 37 different systems to operate on the same channel without overlap. Plug-in reed locks unit "on # channel"—no missed calls due to "wrong" position on selector switches!
- Universal mounting bracket for left, right, or remote mounting under dashboard or desk!
- Tone signal heard beyond normal voice communication distance, increasing coverage by miles!

Only 1½" wide x 4" high x 7¾" deep — wired with all cables and hardware.

Cat. No. 250-810 115 VAC and 6 VDC **$59.95**
Cat. No. 250-811 115 VAC and 12 VDC . . . . . **NET**

International, Heath Company, Globe Electronics Division, RME Division, Raytheon, Tram Electronics, Antenna Co. of America, Browning Labs, Biggs Electronics, Business Radio, Ziff Davis Publishing, Cowan Publishing, 10-4 Magazine, Mesur-Matic, American Geloso, etc. Equipment on display will include, in addition to Citizens Band, AM-FM Radio, Multiplex, Dictating Machines, Intercoms, New Phone Systems, Ham Equipment, Commercial Two-Way Radio, Marine Radio, Aviation Radio, Hobby Remote Control Radio, Tape Recorders, Closed Circuit T.V., Single Sideband and Language Laboratory Equipment.

Designed to entice the general public will be such attention getters as The Big Broadcast of 1962 - which will present, in person, and on recordings, many of the stars of old-time radio, such as the A&P Gypsies, The Cliquot Club Eskimos, Myrt and Marge, Henry Aldrich and Jack Armstrong.

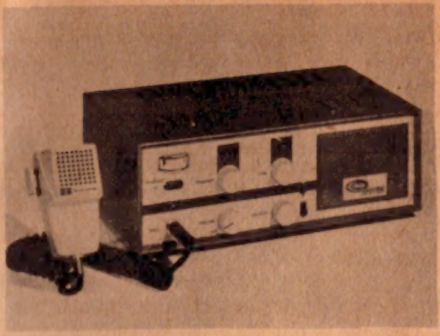
Other attractions will include an FCC-licensed Ham radio station that will enable the crowds at the Coliseum to send messages to friends and relatives in the armed services throughout the United States and much of the world, a Meseum of the History of Radio, and displays by NASA, movies and talks.

In short, 1962 will be marked down as the year Christmas came early for the Citizens Band and Communications industries.

NEW SHURE CB MICROPHONE IS STANDARD EQUIPMENT ON OLSON ELECTRONIC TRANSCEIVER

One of the first Citizen Band transceivers to feature the new Shure Model 201 CB microphone as standard equipment has been announced by Olson Electronics, Akron, Ohio.

Called the Olson "Spotter" RA 530, the new unit is said to surpass any competitively priced unit in both specifications and performance. Included among the unit's many features is the convenience of variable tuning receive, claimed to have the stability of crystal control through the utilization of a new audio-visual spotter. By using the spotter switch, the exact receive channel tuning point is indicated on an "S" Meter as well as by an audible tone signal.



The Model 201 microphone's contribution to the RA 530's quality rating is its special design as a CB microphone with "shaped" voice response patterned after professional mobile and SSB amateur response curves.

Just recently introduced by Shure, the 201 is a palm microphone equipped with a guaranteed, long-life push-to-talk switch, making it ideal for both mobile and fixed station use. It is a ceramic, high impedance unit with frequency response of 200 to 4,000 cps. It was selected for use on the RA 530 after exhaustive comparison testing.

The RA 530 is rated at a full five watts input, with 100% modulation, 3 watts or more output. A built-in power supply provides operation on 110-125 Volts AC; 5 and 12 Volts DC.

The RA 530, equipped with the Shure Model 201 microphone ready for plug in, lists at $119.95. For additional information, write Olson Electronics, Dept. K.C. 260 South Forge Street, Akron 8, Ohio.

DIATHERMY

Dear Sir:

First read your C/B NEWS this month. Received the set from November 1961 to June 1962 from Richard LaBo of Toledo, Ohio. I believe its the most interesting magazine I have ever read. Is there any chance of a Canadian C/B'er receiving C/B NEWS? Sure would like to.

Yours truly,
C. A. Sabean, Box 42,
Kingston, N.S., Canada.
C/B calls: XM-63062 (Base)
XM-63063 (Mobile).

Ed. Note: Thanks a million C. A., for your letter, and welcome. We have you on the mailing list for C/B NEWS. How about keeping us posted on C/B in Canada?

Dear Sir:

We have a large wall map of the United States in our C/B shack. When we receive cards we put a star on the map to represent the state and city of the sender. In two years we have covered over half of the states but it is proving to be next to impossible to get cards from the rest of the states. All cards are welcome and will be acknowledged, but we would especially like these following states to let us represent them on our map. Oregon, Idaho, Nebraska, Montana, Wyoming, Utah, Arizona, New Mexico, South Dakota, Nevada, Minnesota, Louisiana, Vermont, New Hampshire, Maine, Alaska, and Hawaii. We also wish to thank you sincerely for your wonderful magazine.

George King, 18W5040,
P.O. Box 22, Barstow, Illinois

Ed. Note: If our guess is right, George, it won't be too long until you have that map full of stars. How about it readers. Let us know how you make out, George.

Dear Sirs:

How lucky can one get? We received our copy of the C/B news (October issue) today and want to thank you for adding our name to the mailing list. We have read our issue page for page and enjoyed it.

C/B'ERS ACCIDENT INSURANCE

$12,000.00 Accidental Death & Dismemberment

$12,000.00 Permanent Total Disability

$ 1,000.00 Blanket Accident Medical Expense

$ 25.00 Annual Premium (Age 21 thru 64)

$5,000 Accidental Death & Dismemberment

$1,000 Blanket Accident Medical Expense

$25.00 Annual Premium (Age 65 thru 69)

Coverage anywhere in the world from accident involving an automobile (including your own).

Plus coverage while a passenger in any aircraft, land or water common carrier licensed to carry passengers for hire.

This coverage also available for your wife, or husband. **INCREASED LIMITS AVAILABLE.**

$250,000 ages 21 thru 64

$100,000 ages 65 thru 69

This coverage written through MacArthur Insurance Group, Chicago, Illinois (Not available at this time in Alaska, Mass., New Jersey, New York, Rhode Island or Wisconsin).

Insurance Applied For Is Subject To The Company's Approval

It was very much a coincident but in this issue, the Diathermy Section (page 12) you have published an article from 2Q6923 Aupperlee Kearney, New Jersey about their introduction to the C/B News and also their contacts they made while they were visiting their son at Kessler Field, Biloxi, Mississippi. Their visit there was approximately the first of September. Then they proceeded to their destination and had to come through Freeport, Illinois and we had the privilege of meeting them eyeball and they visited us at our home for coffee and we gave a call to other C/B'ers and by the time the evening was gone and it was the wee hours in the morning, we had over thirty five coffee drinkers. So you see we are very glad to say we are part of the club.

Also if you will we would like to sign up for the Call Card Exchange Club. Enclosed please find our Call Card.

Thank you again for our magazine and we will be looking for the following issues.

Best of 73's,
Scotty and Roy Ortmeier
35 Arcade Court
Freeport, Illinois

Sometime back around July 1, 1962, I wrote you a letter regarding the use of a "Q" meter in the field strength meter described by Howard V. Worley, Jr., in the June 1962 issue of C/B NEWS. You answered that you didn't think it would do any harm to try it. Thanks to the cooperation of the field engineer, Mr. A. D. Stephens of Simpson Electric Co., Chicago, I was able to convert this meter I have so it could be used. I followed Worley's, idea throughout and the result for me is that there isn't a better field strength meter in Northwest Arkansas. My thanks to you and Howard Worley, Jr., for a fine meter.

Yours respectfully,
Harry E. Heckart, Route 1,
Winslow, Arkansas

Ed. Note: Thank you Harry for your letter. By the way, the Publisher is doing a lot of thinking on your call card??? We all got a big (kick) out of it.

JUST KEEP HIM THERE!

Thanks to Louis LaVasseur of Lansing, Michigan, the picture shows the most unusual C/B fan I know of. This pleasant little fellow is owned by Mr. and Mrs. Ernie Wright of Monroe, Mich.

He was at the Raison Valley C/B Jamboree on September 9th in Dundee, Michigan. He was also at the Tri-County C/B Club at alma, Michigan, on Sept. 23. How would you like to have him enforcing Part-19?

TRI-STATE JOINT CONFERENCE

On September 9, 1962 the Congress of Clubs held its third meeting of the year. The hosting club was the Allegheny-Kiski Five Watters, with their president Don Haggerty as acting chairman. The seven clubs represented were: CBRangers, Five-Eleven Radio Club Inc., Western Area, A.V.C.R., CBanders, Fay West, and the hosting club. This was the first Congress of Clubs meeting for the Western Area Club.

The minutes of the last meeting on June 10, 1962 were approved as read.

Then Mr. Haggerty read the letter from Mr. C. Spencer, district engineer in charge of the F.C.C. Mr. Spencer declined the invitation extended to attend the meeting with the explanation that all field representatives were unable to attend any meetings no matter how large or small until the new rules pertaining to Part 19 went into affect.

Mr. Roy Bartges, representing the CBanders, made a motion to change the names of permanent chairman and permanent secretary to current chairman and current secretary, with a term of two years. Mr. Jess Boring seconded the motion. The A.V.C.R. debated back and forth about the main purpose of the Congress of Clubs and what the duties would be of the current chairman and the current secretary. After open nominations, Mr. John King was appointed current chairman, with Mr. William Jenkins as current secretary. John King is from A.V.C.R. and William Jenkins from Fay West.

The seven clubs represented voted on the name of TRI-STATE JOINT CONFERENCE OF CITIZENS BAND RADIO CLUBS!!!

There were general discussions on Night Owlers, caravans of traveling CB'ers being dangerous and channel nines.

A most enjoyable lunch was served after the meeting, which has lasted about 2½ hours.

The CB Rangers of Butler, Pa. will hold the next meeting the second week in December.

- o -

Elected recently at the Tri-State Joint Conference of Citizens Band Radio Clubs were current chairman John King (left) of The Allegheny Valley Citizens Radio Club and the current Secretary, William Jenkins of The Fay West C/B Club on the right.

A good crowd and nice sunny weather prevailed for the picnic held by The Sociable Five Watts C/B Club of Beaver, Pennsylvania late in September.

This C/B Picnic hosted by C/Bers from the Butler-Clarion, Pennsylvania area was held September 22nd at Emlenton, Pa. Although foul weather prevailed a nice group turned out.

NEW CITIZENS BAND TRANSCEIVER OFFERS 10 CHANNEL COVERAGE AND INCREASED RECEIVER SENSITIVITY AND SELECTIVITY!

The E. F. Johnson Company of Waseca, Minnesota has announced the immediate availability of their new "Messenger Two" Citizens Band Transceiver. The "Messenger Two" is a complete 10-tube, including rectifier, crystal controled transceiver for use on the Citizens Band and may be operated by anyone for business or personal use - licenses are issued to citizens 18 years of age or older by the F.C.C., and are readily available upon application by using forms supplied with the unit. The "Messenger Two" is ideal for contractors, farmers, ranchers, delivery services, small businesses, or for use by sportsmen for hunting, fishing or boating.

Modern chrome and black front panel design blends with any decor - basic circuitry has been patterned after that of the popular "Messenger", but includes a number of new features. The unit is designed for coverage of any 10 channels in the 23 channel band, has an illuminated channel indicator, and permits instant selection of any one channel by simply rotating the channel selector switch. The receiver section has been designed to offer increased sensitivity and high adjacent channel rejection ; transmitter circuitry has been designed for more than twice the input power used on the Citizens Band for high reliability and extended component life. Circuitry efficiency makes full use of the maximum legal input power to deliver a penetrating signal with full fidelity voice reproduction. Designed for extra-quiet receiver operation, the "Messenger Two" contains a new noise limiter circuit to effectively knock out a high degree of electrical and ignition noise. Automatic volume control circuit prevents distortion at close ranges - positive acting "squelch" control circuit lets you set your receiver sensitivity at the best possible point under varying conditions.

The complete transceiver measures 5 5/8" high, 7" wide, and 11 3/8" deep - universal mounting bracket makes the unit easy and fast to mount under the dashboard of a car or truck -rubber mounting feet protect desks or furniture when the "Messenger Two" is placed in a typical indoor base station location.

Priced at $169.95, the "Messenger Two" is available in two basic models - one for use on either 115 volts AC or 6 volts DC, the other for use on 115 volts AC and 12 volts DC. Furnished complete with push-to-talk microphone, coiled cord, and crystals for 1 channel. For further information and detailed specifications, write directly to: E. F. Johnson Company, Dept. K.C., Waseca, Minnesota.

LAFAYETTE MODEL TM-58 SWR BRIDGE AND RF POWER METER

Lafayette Radio Electronics Corporation, 111 Jericho Turnpike, Syosset, L.I., New York introduces a new SWR Bridge and RF Power Meter. Designated the TM-58, it will sell for 27.95 net.

The TM-58 is a quality instrument which will give highly accurate SWR and direct power readings up to 50 MC. It may be inserted permanently in the transmission line for SWR and relative power monitoring. When the 3-position selector

switch is set to POWER, the meter will indicate the RF power up to 15 watts, into a built-in 52 ohm dummy load. The selector switch is set to FWD to read relative forward power up to 1 KW and to adjust the sensitivity control for SWR measurements. For direct SWR measurements from 1:1 to 4:1 with powers up to a kilowatt, the selector switch is set to REFL. Full scale accuracy is 10%. Meter has a 50 microampere movement; calibrated directly in watts from 0-15, and in SWR from 1 to 4 (reads infinity at full scale). Insertion loss is negligible. Housed in an attractive grey metal cabinet measuring 7¼W x 3 1/8 x 2 3/8D. Sits on 4 rubber feet. Shipping weight, 2 lbs.

CORRECTION

Seems like the Post Office in a new move changed the box number of the SUNFLOWER CITIZENS RADIO CLUB. The new and correct address for those of you who are keeping a list of Club addresses is SUNFLOWER CITIZENS RADIO CLUB P.O. BOX 4169, OVERLAND PARK, KANSAS.

TO ALL SAGINAW VALLEY CB'ERS:

You now have a complete CB service shop available for servicing all types of CB equipment, and at the hours that you are usually free to come in. WE ARE NOW SPECIALIZING IN CB REPAIRS, AND ARE NO LONGER MAKING TV SERVICE CALLS.

Our hours will be from 4:00 p.m., to 10:00 p.m., Monday through Friday, and on Saturdays, from 9:00 a.m., to 6:00 p.m. - later on Saturday night by appointment. These hours will apply throughout the winter and spring.

We have crystals for most sets, including Vocaline, General, Citifone, Gonset, Hallicrafter, Executive, Ray-Tel, Johnson, Sonar, Lafayette, and many others. When we sell you a crystal, we frequency-check it in your unit at no extra charge.

This shop is run under a First Class

Radio-Telephone license issued by the Federal Communications Commission, which authorizes us to do a complete service job on CB rigs.

We have very accurate frequency-checking equipment, and will, at your request, check the frequency of your equipment either on the air, or in the shop free of charge, if you are a CB club member and not a dealer. This does not "certify" the frequency of the equipment, but will usually tell whether work is needed on the equipment. (In other communication services, the FCC requires that the frequency and other items be thoroughly checked at least once a year. It is very wise to do the same with CB equipment, even though this is not yet required of CB equipment owners). A charge is made for "certification" of the frequency. This requires paper work).

This shop is an authorized dealer for Vocaline and Sonar, and is also a "Certified Service Station" for Raytheons "Ray-Tel" units. We service all types of units, INCLUDING what we sell. WE ALSO SELL GENERAL RADIO CB RIGS, AND OTHER GENERAL RADIO COMPANY EQUIPMENT.

Our CB call is 19QA0480. Most of the time you will find us standing by on Channel 2, during the above hours.

Two telephone numbers are available at ANY HOUR. SW 2-4621 - SW 2-4561

In compliance with the regulations of TESA-Saginaw County, TESA-Michigan, and NATESA, of which this shop is a member, we do not advertise prices either on the air or publicly in any way. You will find these posted in the shop.

We now have contracts through which we are able to obtain those "hard to get" parts, usually within a few days.

When you have difficulties with your rig, think of us. DEALER SERVICE INVITED.

FIVE COUNTY C/B CLUB, INC.

This new C/B club has just been organized and takes in the five counties of Ness, Lane, Scott, Finney and Hodgeman, Kansas. Word from Lee Dechant, President, informs us that the meetings are the first Thursday of each month, and and the club rotates cities for the meetings. Meetings have been held at Garden City, Kansas, and Dighton, Kansas. Present membership is 35, and the club expects at least 100 members in the near future. 3 channels, 4,7, and 11 will be monitored by the club. The club extends its hospitality to anyone passing through their area, and any C/B'er is welcome to their meetings.

THE OPEN MIND

Within a very short while a very important phase of Citizens Band Radio club operations will come into focus..... The election of club officers and committeemen for the calendar year of 1963. Although some club members may regard this as relatively unimportant, it is, in reality, the exact opposite. The people that you, the members, place in office can and will determine the success or failure of the entire club. Sad to say, elections are some times hindered by two things -Friendship and personal dislike. Granted, its hard to look over these 'walls' of personal feelings, but when the future and very existance of an organization are at stake each club member must do what is best for the group as a whole.....not himself. A very good friend of yours may not be capable or qualified to handle the responsibility of a club officer and likewise the very person for whom you may have a great dislike may be the very one who can carry the club on to greater heights. After all, the main goals are the programs outlined by the club; all devoted towards a better eleven meter band. It is essential then, that you as a club member approach election of club officers with an open mind. This will help to insure that these aims are carried out. Evaluate each member on his merits as a club member and worker; not on which side of his head he parts his hair.

It might be said that whether you are elected to an office or not, give your club officers the support you would expect if you had been elected. While the responsibility of leadership rests primarily with the officers they need you as an active member to make the club function properly. If everyone will pull his fair share it will certainly be easier for the balance of the membership. Most clubs have too many people doing the work of five or six members. This isn't very fair. Citizens Radio Clubs are no place for the 'One Man Band' type of operation; Clubs are a group effort....This means every member. The next time you hear the expression "We did it," lets make sure its "WE" not "wee."

SOONER C/B CLUB

The Sooner C.B. Club, Del City, Midwest City, Oklahoma held it's annual election of Officers during the regular September meeting in the Del City, City Hall.

Those elected to serve during the Club's second year are:

President	Jim Pribble 10Q1107
Vice President	Leroy Shultz 10Q2363
Secretary	Mrs. Pete Kinsey 10W3808
Treasurer	Mrs. Ed Hart KEG2763

Club members monitor Channel 11 and are prepared to assist traveling C.B.'ers with road information, Motel accommodations, etc.

Future Club activities include plans of various ways in which they can help the communities, bowling parties, field trips, Transmitter hunt, costume party and weiner roast.

CEREAL CITY C/B CLUB

Late word from Down W. Cortright, President of the Cereal City Citizens Radio Club, informs us that the club now has over 100 members. They meet on the first Wednesday of each month at 7:30 p.m. at the Post Cereals club house, The club mailing address is P. O. Box 91, Battle Creek, Michigan. The monitor channel is 3. Other officers are Richard Kline-Vice President, Don Waters-Secretary and Hazel Sykes-Treasurer.
